Dated, 15 - 10 - 1932.

From: M. Sultan Mohiyuddin, M.A., LL.B., M.Ed.,

OFFICE OF THE RESIDENT IN MYSORE.
BANGALORE.
17 OCT 1932
Regd. No. 9353
File. No.

My dear Sir,

When you visited the gardening school on the 30th ultimo, you desired me to obtain information regarding the after-careers of the pupils in that school and submit it to you.

It is reported by the Chief Instructor in that school, that since the inception of this school in September 1923, 154 boys joined it, of whom only 62 have so far completed the course. Of these, it is ascertained, 30 are employed as gardeners and 9 have changed their occupation and applied themselves to some other work. The whereabouts of 8 are not known; and 15 are reported to be unemployed, owing to the scarcity of water in Bangalore for gardening purposes.

The figures do not present a satisfactory picture. In the first place, the incidence of wastage is heavy, by reason of the fact that only 40% of the pupils who take the course complete it, and even of this small number, hardly 50% have found employment as gardeners. Thus, only about 20% of those who joined the course were able to get employment and the prospect of the percentage increasing in the near future is by no means bright. I should submit in

s

(2)

Para 1 of G.O. No. 31 47/23 (A)

On the recommendation of Mr. J.A.Yates, late Inspector of Schools, Coorg and Bangalore, permission was granted in March 1923 to the opening of a gardening class in a boys' school at Jougpalyam under the Municipal Commission for the

instruction

submit in this connection that I am given to understand that prospective employers prefer the ordinary ' Malis ' of practical experience to the young-men turned out by the institution, on the ground that the latter being relatively young are not capable of as ~~much~~ hard and sustained manual labour as the former. I am inclined to believe that some of the boys join the school for the stipend of Rs.5/- per mensem which is paid to them until the course is completed.

A vocational course which does not presuppose a demand for skilled labour which it is designed to satisfy, cannot be regarded as justified from the economic point of view. It appears to me, therefore, that if the saturation point in the absorption of trained gardeners has been reached - and the figures clearly indicate that it has been - the institution only serves the purpose of diverting the current of unemployment ~~of the children~~ and postponing by three years the unemployment of the children who join it. To avoid ~~the~~ wastage of funds, it seems to be necessary either to modify the course so as to train children in farming and agriculture on improved lines, or to close down the school, at any rate, for sometime. The success of the first alternative will, however, greatly depend upon the selection of children of the agricultural class who will return to their parents' farms after training.

Yours obediently,
M. G. Nizamuddin

To
The Hon. Lt. Col. R.J.C. Burke,
Resident in Mysore.

that part of the town. The object was to improve the standard of horticulture and market gardening and to give boys of the working classes a training which would enable them to earn a decent living. In a letter to the Govt. of India in 1925, it was stated that the Hon'ble the Resident was satisfied that real constructive work was being done.

Para 3 of S.N. 31 / 47/23 (A) (3)

In 1927, on the recommendation of the Resident, the Govt. of India sanctioned the continuance of the grant-in-aid of Rs 4,640 towards the cost of maintenance of the Municipal Gardening School.

para 2 of S.N. 41 / 47/23 (X) (4)

In January 1929, to an enquiry by the Inspector of Schools, ~~it~~ he was ~~replied~~ informed that the grant-in-aid of Rs. 4,640 paid to the Municipal Commission would be continued as long as the Commission maintained the Gardening School and that, subject to the concurrence of the Hon'ble the Resident, it was for the Commission to decide whether the school would be continued permanently.

S.N. 46 / 47/23 (C)

In April 1929, the Resident confirmed the resolution of the Commission ~~proposing~~ that the Municipal Gardening School be made permanent.

(5) S.N. 50 / 47/23 (E) (6)

From the commencement up to the end of 1931-32, the Govt. have paid about Rs. 43,946 towards capital expenditure and annual maintenance charges.

(7)

It appears from Mr. Sultan Mohiyuddin's D.O.letter that only 40% of the pupils who take up the course in the Gardening School ~~stay to~~ complete it and that, even of this small number, hardly 50% have found employment as gardeners. Thus only about 20% of those who joined the course were able to get employment and the prospect of the percentage increasin in the near future is said to be by no means bright. He says that to avoid waste of funds, it seems necessary either to modify the course so as to train children in farming and agriculture on improved lines or to close down the school, at any rate, for some time.

vide S.N. 46 / 47-23 (8) (C)

As the school is owned and run by the Municipal Commission though with a grant-in-aid from Government, it seems

seems desirable to obtain their views before we [redacted] decide [redacted] the steps to be taken in the matter.

(9) Submitted for orders whether the President, Municipal Commission, may be addressed incorporating in the letter to him the matter contained in the D.O.letter of the Inspector of Schools.

P.V. Krishnaswamy
19.10.32.

(From para 1)

P.u.c. S.N. 4

Letter No. G.T. 81/32, dated the 2nd Feby. 1933, from the President, Municipal Commission.

13

Mr. Sultan Mohiyuddin who was acting as Inspector of Schools, suggested that to avoid waste of funds it seemed necessary to close down the gardening school in Ulsoor, at any rate, for some time or to modify the course so as to train children in farming and agriculture on improved lines. The gardening school is financed by Govt. but the school is actually run by the Municipal Commission. The views of the Municipal Commission were therefore invited on the proposal of Mr. Mohiyuddin. At an ordinary meeting of the Municipal Commn. held on the 26th Jany. 1933, the Commission resolved that the gardening school be closed. The matter was also referred to the permanent Inspector of Schools, Mr. Edmonds. The Inspector is not in favour of closing the School vide his note dated the 12th Dec. 1932, attached to the P.U.C. The President of the Municipal Commission is in general agreement with the views of Mr. Edmonds and considers that it would be a pity to close such a unique institution unless and until it is proved beyond doubt that it serves no useful purpose.

14

The object of instituting a gardening school in Bangalore

as to impart instruction to the children of garden labourers with a view to improve the standard of horticulture and market gardening and to give boys of the working classes a training which would enable them to earn a decent living. Horticulture is closely connected with agriculture. The development of horticulture was one of the recommendations made by the Royal Commission on Agriculture in India. - vide- paragraphs 518 to 519 of the Report of the Royal Commission on Agriculture in India... In Bangalore there is no scope for the development of Agriculture. Practically the only scheme in existence in Bangalore, which has a bearing on the recommendations of the Royal Commission on Agriculture, is the institution of the gardening school in Ulsoor. It may be true that all the boys who undergo training in the gardening school do not ~~all of them~~ get employment. But the fact remains that they do get a training which gives them a technical knowledge in gardening and also a bent for manual labour. A boy who comes out trained in this school can naturally attempt better horticulture than is common among the local malis. If he fails to get employment under another, he can attempt to work his own plot and market the produce therefrom.

S.N.31 (A) 47-23 (para 1)

*Pages 595-597 of the report-font wp. (R) (summed)

15

In the foregoing circumstances, and having regard to the

the fact that both the President Municipal Commission and the Inspector of Schools are not in favour of closing down the school, perhaps it may be continued, in any case, during 1933-34. The proposed budget for the year 1933-34 includes provision for the running of the school. A special report regarding the continuance of the school after this period may be called for, and the question whether it should be closed down or not may be examined further, then.

For orders.

17 No. I entirely disagree. It is useless

Draft submitted.

S.N. 5 Issued No. 2472, dated the 23rd March 1933.

Letter No. 1287(1)/14-24, dated the 19th April 1933, from Inspector of Schools, Coorg and Bangalore.

The sanction conveyed in March 1923 for the opening of a gardening School in Bangalore C.&M. Stn., was revoked by the orders contained in S.N. 5 for the closure of the School with effect from the 1st April 1933. The Inspector of Schools has now raised the question as to the disposal of the buildings etc., occupied by the School.

It is true that the Govt. did sanction the payment to the Municipal Commission of a sum of Rs. 7,930 to cover, among others, the following items of capital expenditure in connection with the opening of the School:-

(1) Acquisition of land	Rs. 1,800	
(2) Sheds, Class rooms and quarters.	Rs. 1,500	
(3) Wall and fence	Rs. 2,000	
(4) Pump and Well	Rs. 1,500	(part of cost of well met by Municipal Commission)

The School was actually owned and managed by the Municipal Commission and the payment made by Govt. towards the building and the management was in the form of a grant, falling within the purview of Article 58 of the Grant-in-aid Code for Indian Schools in the C.& M. Station. The Grant-in-aid Code does not, however, lay down any rule regarding the recovery or

otherwise of the building grant paid to the Municipal Commission for educational purposes, while a specific rule exists in Article 48 of the Code for the recovery, in certain circumstances, of such grants from private management, should the building for which the grant is paid be diverted to purposes other than educational. It would seem, however, that on grounds of general principle, the Municipal Commission should relinquish the building to Govt. when the object, for which the Govt. financed the Commission to acquire the building, ceases to exist. If the Municipal Commission wish to utilise the building for other educational purposes, it will only be fair and in conformity with the educational policy of Govt. that they should be allowed to retain the building.

3 In the circumstances stated above, it seems that unless they require the buildings for other educational purposes, the Municipal Commission should either transfer the buildings to Govt. before the Inspector can arrange for their disposal or they should themselves dispose of the buildings and credit the proceeds to Govt. Before proceeding on the above lines, the file may be sent u/o to the Financial Adviser for favour of remarks, if any.

(from para 1)

4.5.33

The Financial Adviser to the Hon'ble the Resident, U.O.

4

The general principles of the Grant-in-aid Code should be held to apply whatever be the agency to which aid is given. On the analogy of Rule 48 of the Grant-in-aid Code, it appears therefore that the building should be handed over to Government as it will not be utilised for the purpose for which it was built.

5

If the Municipal Commission require the building for other educational purposes, it would seem that the Commission should make a fresh application to be dealt with under Rule 58 of the Grant-in-aid Code.

S.N.12

Issued No.9139, dated the 11th September 1933.

Letter No.G.t.81/32, dated the 10th October 1933, from the President, Municipal Commission, C & M Station, Bangalore.

The Municipal Gardening School was closed with effect from 1st April 1933. The question then arose as to the disposal of the building, etc., occupied by the school for which the Govt. had sanctioned a grant of Rs.7,930 from the M.A.T.Revenues.

The President, Municipal Commission suggested in May 1933, that the Commission should be considered as absolute owners of the land and building occupied by the school. He was informed that, on the analogy of Article 48 of the Grant in aid Code for Indian Schools in the C & M Station, Bangalore, the land and building should be handed over to Govt. as the purpose for which they were acquired had ceased to exist and that, if the Commission required the building for other educational purposes, they should make a fresh application in that behalf.

In August 1933, the President, M.C. reported that the question of utilising the land, building for housing a school was under consideration, but requested permission, at the same time, for the sale of superfluous land. Sanction was accorded to the sale of the land by public auction and to credit the proceeds to Government.

The President, M.C. now reports that the Municipal Commission have resolved that the entire building and site be sold by public auction and that the sale proceeds be utilised, with the permission of the Hon'ble the Resident, for the construction of buildings on a more central site for Municipal Muhammadan and Hindu girls' Schools in Ulsoor, which are at present localted in rented buildings.

He

He requests that, since the purpose for which the Commission required the amount is an educational purpose, the Commission's application may be favourably considered. He further states that, as the land is fast deteriorating, he is issuing instructions to the Municipal Auctioneers to sell the whole plot with the building in anticipation of the Resident's sanction.

Sanction may be accorded to the sale of the building and the land by public auction and to credit the proceeds to Government. As regards the utilisation of the sale proceeds for the construction of buildings on a more central site for the Municipal Muhammadan and Hindu Girls' Schools in Ulsoor, the President, Municipal Commission may be informed that the Commission should submit an application in that behalf through the Inspector of Schools, Coorg and Bangalore.

Draft submitted.

Subject.

Municipal Gardening School.

SIR,

I am directed to state that the Hon'ble the Resident, who visited the Municipal Gardening School on the 30th September, 1932, made enquiries about the after careers of the pupils in that school and he now understands from the Inspector of Schools that, since the inception of the School in September, 1923, 154 boys joined it of whom only 62 have so far completed the course. Of these, 30 are employed as gardeners and 9 have changed their occupation and applied themselves to some other work. The whereabouts of 8 are not known and 15 are said to be unemployed owing to the scarcity of water in the Station for gardening purposes. I am to say that these figures are far from satisfactory. In the first place, the incidence of wastage is heavy, by reason of the fact that only 40 per cent. of the pupils who take the course complete it and even of this small number, hardly 50 per cent. have found employment as gardeners. Thus, only about 20 per cent. of those who joined the course were able to get employment and the prospect of the percentage increasing in the near future appears to be by no means bright. It is understood that prospective employers prefer the ordinary 'Malis' of practical experience to the young men turned out by the institution, on the ground that the latter being relatively young are not capable of as hard and sustained manual labour as the former. It is believed

that some of the boys join the school for the stipend of Rs.5/- per mensem which is paid to them until the course is completed.

2. I am to observe that a vocational course, which does not presuppose a demand for skilled labour which it is designed to satisfy, cannot be regarded as justified from an economic point of view. It appears, therefore, that, if the saturation point in the absorption of trained gardeners has been reached - and the figures clearly indicate that it has been - , the institution only serves the purpose of diverting the current of unemployment and postponing by three years the unemployment of the children who join it. To avoid wastage of funds, it seems to be necessary either to modify the course so as to train children in farming and agriculture on improved lines, or to close down the School, at any rate, for some time. The success of the first alternative will, however, greatly depend upon the selection of children of the agricultural class who will return to their parents' farms after training.

3. I am to request that the Hon'ble the Resident may be favoured with the views of the Municipal Commission in the matter.

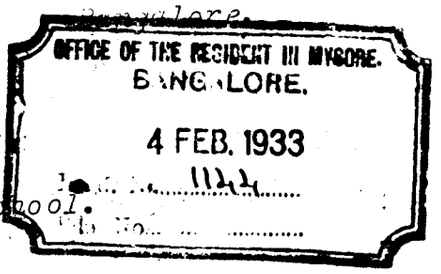
To

The Secretary to the Hon'ble the Resident in Mysore,
Bangalore.



SIR,

Municipal Gardening School.

S.N. 39

With reference to your letter No. 7609/123-1932, dated the 10th November 1932, calling for the views of the Municipal Commission on the question of modifying the course at the Municipal Gardening School or of closing down the school for sometime, I have the honour to forward a copy of the Commission's resolution No. 3 dated the 26th January 1933, expressing their approval of the proposal to close down the school.

I have to point out that the Inspector of Schools to whom I forwarded your letter for remarks is not in favour of closing the school. I enclose for your information a copy of Mr. Edmonds' note as well as the note of the Educational Superintendent. I am in general agreement with Mr. Edmonds' views and consider that it would be a pity to close such a unique institution unless and until it is proved beyond doubt that it serves no useful purpose.

I have the honour to be,
Sir,
Your most obedient servant,

President, M. C.

Municipal Commission's resolution dated the 26th January 1933. (Ordinary meeting).

---

3. Letter dated the 10th November 1932, from the Secretary to the Resident calling for the views of the Commission in regard to the modification of the course at the Municipal Gardening School or the closing of the school for sometime.

// Recommended by a majority of the members that the Gardening School be closed down.

The Vice-President proposed that the recommendation of the Educational Sub-Committee be accepted and Mr. R. Venkatasawmy Naidu seconded the proposal.

The President put the proposal to the meeting and it was carried.

Resolved that the Secretary to the Resident be informed that the Municipal Commission are in favour of closing down the Gardening School.

(Sd). G. H. Cooke,

President, M. C.

" Copy. "

MVL.

Inspector of School's note dated the 12th December 1932.

The Educational Superintendent rightly points out in his note that the figures given in the Secretary to the Resident's letter are not given their true interpretation. It is incorrect to say that only 40% of those who enter the school complete the course. 62 out of 114 have so far completed the course, both figures excluding those pupils at present studying in the school and if, as may be presumed, all those now on the rolls complete the course, it will mean that 102 out of 154 or 66% have receive the full benefit of the training. It may be noted that of those boys admitted in September 1931, not one has left the school and there is no indication that any of the present batch will leave before the proper time. I am sure that the Resident will agree that these figures give rather a brighter aspect to the matter. Of those who leave before the course has finished, some leave the district owing to the transfer or removal of their parents. Others have to be removed from the rolls because of continued absence. I am afraid that the execution of the bond on entrance to the school means little. Mr. Yates recognised this and did not think it worth while to institute the practice. But Mr. Saunders during his term of office here, thought that while it might not be possible in the last resort to enforce the terms of the bond (i.e., to order a refund of the stipends paid in cases where the pupil left the school before the end of the course), the signing of the bond might have a ~~different~~ deterrent effect on boys leaving before the due time. In any case, I fear, that the boys concerned would be too poor to produce the money if asked to do so, and legal proceedings would hardly be worth the expense!

2. I have pointed out that the incidence of wastage is the order of 33% (not 60% as mentioned in the Secretary to the Resident's letter). This wastage does not appear serious by comparison with the appalling wastage which is going on in every Elementary School in this station. The number of children studying in standard IV of the Municipal Schools is approxi-

S.N. 3
(Q)

approximately 75% of those who begin school in standard Elementary Schools leave before they attain literacy!

I personally feel that the money spent on running the Gardening School is well spent for the sake of the 60% or so of the pupils who finish the course. The school has probably served at least to divert 154 boys from a secondary education for which they were mentally unfitted and 102 of these boys, will, I hope, have gained something, some technical knowledge which is surely more valuable to them than a smattering of the more useful avademic subjects.

3. As regards the employment question, the restricted water-supply in Bangalore has undoubtedly lessened the chances of employment of the students of this school. But it is a fair presumption that with the coming of an unrestricted water supply during 1933 the demand for malis will increase. But the Educational Superintendent has made, in his note, some very pertinent remarks on the employment question. He very rightly points out that ultimate usefulness rather than immediate use-fulness is the aim of the course. Such schools are intended to give boys a bent for manual rather than clerical labour. The Secretary to the Resident quoting from a letter from Mr. Mohiyuddin on the subject, stated that the school merely serves to divert the current of employment and to postpone the un-employment of the children who join it. But there is clearly an important difference between a supply of unemployed and unskilled child labour and a supply of unemployed youths of 17 or 18 who have received a technical training at the Gardening School. The latter are potentially employable. The economic value of the former is negligible. I should like to draw attention to the fact that two at least of the former students of the school are working their own plots of land and marketting the produce therefrom. I think that the possibilities of this kind of employment might be further explored. I suggest that it might be found practicable to withhold part of the stipends, by agreement with certain pupils, and to allow such pupils to work free of charge a small plot of ground after they have

satisfactorily completed the course.

4. In view of the strong probability that the demand for malis will increase during the next year or two, and on the grounds that I have stated in this note, I strongly recommend that the Gardening School be allowed to continue in its present form.

(Sd). F. F. C. Edmonds,
Inspector of Schools.

" Copy. "

MVL.

Educational Superintendent's note dated the 16th November 1932.

The percentages shown in the letter of the S. R. are inaccurate. The Inspector of Schools called for these figures under certain definite headings and one more point was not considered to properly arrive at the figures. I give below the correct percentages:-

Number that joined since inception	(a). ..	154.
Number that have left after finishing course. ..	(b). ..	62.
Number still in course and likely to finish course.	(c). ..	40.
Total that must be deemed to finish course (b) plus (c). ..	(d). --	102.
Percentage of course finishing boys 102 : 154.	(e). ..	66.2
Percentage that got employment (30 : 66.2)	(f).	45.2

Otherwise the remarks in the letter under reference are accurate One more point also may be considered that the school gives valuable vocational instruction half a day per week to all the pupil teachers of the Government Training School, in gardening. Viewed at from purely financial point of view, the school would appear to be wasteful. But the present ideas of education emphasise vocational training, so much so, that, in the newly revised S.S.L.C. Curriculum of studies, vocational training is made compulsory. In our Municipal elementary schools too, for boys, we have got manual training sections teaching carpentry. We do not expect any pupil to turn out a carpenter, but the training is imparted for hand and eye training and to give to the pupils' minds a turn towards handicrafts and to teach them the dignity of labour. I think the Yates Gardening School is only a special and advanced vocational school. It admits boys under about 15 years of age and as such it is to be classified as an elementary school only. In elementary education we look forward only to ultimate usefulness as distinct from immediate usefulness expected in the secondary of collegiate education. The pupils turned out being very young,

but with time, I hope, they would find value being pla... course they finish in their youth over here. Bangalore is a city of garden houses so far as the wealthier classes are concerned. There is good chance of these pupils being called upon to serve as gardeners in the future. The existence of the Gardening School is known to very few at Bangalore. Publicity is wanted, and with people knowing the existence of such kind of men in the near future, I expect a growing demand to occur for this kind of training. This year, for example, a certain lady has put up her own boy as a non-stipendiary for training. The training that is being given is bound to have some influence on the trained and it might be expected that under favourable circumstances, this training might lay the foundation for cottages also being converted into garden cottages, as they are said to be in European countries. If we could consider the object of the school to be to cultivate a "Garden Sense" among pupils, there are strong grounds for the continuance of the school, even supposing that few get employed as gardeners in the near or distant future. The pupils who seek admission into this school are very poor, and it is true that the question of unemployment is being postponed by three years, at public cost. But if this course had not existed these boys would very likely have fallen into evil ways and this school acts as a very good character training institution by keeping the boys till a maturer age, and teaching them meanwhile the dignity of labour, and showing them a definite means of livelihood. On these grounds I feel that the school justifies its existence.

Its usefulness might be enhanced by arranging a programme of short vacation courses, free of charge, for secondary school and college pupils, thereby employing them during the long summer recess, which goes to waste with them.

It might also be possible to arrange for school teachers to undergo this short vacation course and use the knowledge so obtained to improve existing school gardens.

My definite recommendation is to keep the school on a permanent basis and as an experimental measure, to enlarge its scope by including farming and agriculture. The latter would

mean extra cost for which I shall submit proposals if desired. The institutionis an unique one and I would recommend its existence.

(Sd). T. S. Ramiah,

Educational Superintendent.

No.909/71/24 Dated 15-3-1933.

From

F.F.C.Edmonds Esq., M.A., B.Sc.,

Inspector of Schools, Coorg & Bangalore.

OFFICE OF THE RESIDENT IN MYSORE
BANGALORE.
16 MAR 1933
Regd. No. 2525
File No. 123/32.

To

The Secretary to the Hon'ble the Resident in Mysore,

Bangalore.

Sir,

I have the honour to forward herewith a statement furnished by the President, Municipal Commission, Bangalore, showing the actual expenditure upto 31-12-1932 and the probable expenditure for the remaining three months in respect of the following items, grants for which are payable to the Municipal Commission during the current year together with a statement showing the actual expenditure during 1931-32 on account of the first three items, there being no expenditure under Medical Inspection of Municipal Schools during the period.

(1) Maintenance of Municipal Girls' Schools.

(2) Maintenance of Schools opened under the 5 year programme.

(3) Maintenance of the Yates Gardening School.

(4) Medical Inspection of Municipal Schools.

123/32 Please see also page 3

1. MAINTENANCE OF MUNICIPAL GIRLS' SCHOOLS.

2. From the statement furnished by the President, the Commission anticipate an expenditure during the current year of Rs.15,331-12-9 on the maintenance of 6 Girls' Schools. The details given, however, show that an amount of Rs.300/- incurred towards the cost of equipment and a sum of Rs.200/- spent towards the cost of repairs to buildings have been included. In view

of the orders passed in your letter No.4102, dated 19-5-1930, I propose that the expenditue on these two items be disallowed. The actual expenditure on account of these schools during 1931-32 is stated to be Rs.15005-3-0, out of which a sum of Rs.242-3-0 being the expenditure on equipment and repairs to buildings must be deducted. This leaves a balance of Rs.14,762-11-0. The amount sanctioned last year in Proceedings No.2146, dated 22-3-1932 being Rs.14,653-7-0, the Commission appear to have incurred an expenditure of Rs.109-4-0 over and above the grant sanctioned I, therefore, propose that, if the Hon'ble the Resident has no objection, an amount of Rs.14,831-12-0 plus Rs.109-4-0 = Rs.14,941-0-9 may be sanctioned for payment during the current year. The allotment under the head "Account II-Education D-Grants-in-Aid to Non-Government Primary Schools- Grants-in-Aid to Local Bodies for Primary Education- Maintenance of Municipal Girls' Schools" is Rs.14,900/-. The excess of Rs.41-0-9 may be met from the allotment of Rs.44,400/- under "Grant-in-Aid to Primary Schools" out of which a sum of Rs.400/- has been reserved for the payments of grants to the Municipal Commission towards the Medical Inspection of Municipal Schools but which has not been fully utilised for this pumpose.

Dealt with separately

2. MAINTENANCE OF SCHOOLS UNDER THE 5 YEAR PROGRAMME.

3. The statement furnished shows an anticipated expenditure of Rs.27,388-15-5 during the current year, out of which must be deducted the expenditure of Rs.400/- shown as repairs to buildings, which leaves a balance of Rs.26,988-15-5 to be paid to the Commission. But the actual recurring expenditure during 1931-32 being Rs.27,288-1-3, and the Commission having been paid a grant of Rs.27,500/- in the Proceedings No.2102, dated 21-3-1932 of the Hon'ble the Resident in Mysore, the Commission is liable to refund a sum of Rs.211-14-9. I, therefore, recommend that a sum of Rs.26,988-15-5 minus Rs.211-14-9 = Rs.26,777-0-8 be paid.

-do-

4. As I have pointed out in my letter No.642/21-24, dated

dated 3-3-1932 an amount of Rs.60,900/- has been paid to the Commission under "Capital Expenditure". The expenditure on this account up to 3-3-1932 was Rs.58,665-6-5 and it was stated that the balance of Rs.2,234-8-7 reserved for the construction of the Arab Line Girls' School would be utilised before the close of this year (i.e. before 31-3-1932). But this sum does not appear to have been spent yet according to the President's remarks in the statement furnished. He states however, that the building is expected to be completed by the end of the current year. It is for consideration whether the sum of Rs.2,234-9-7 may be allowed to be retained by the Commission. Otherwise the amount may be deducted from the grant of Rs.26,777-0-8 to be paid to the Commission. The expenditure will be debited to the allotment under the head "Account II-Education D. Grant-in-Aid to Non-Government Primary Schools - Grant-in-Aid to Local Bodies for Primary Education" in the current year's budget. The allotment under the head being Rs.31,100/- the balance may be surrendered to Government.

(3) YATES GARDENING SCHOOL.

55 The President, Municipal Commission, anticipates an expenditure of Rs.4334-4-2 during the current year. In the proceedings No. 2126, dated 21-3-1932 of the Hon'ble the Resident in Mysore, a grant of Rs.4204-4-2 was sanctioned to the Municipal Commission for the year 1931-32. The actual expenditure incurred by the Commission being Rs.4037-7-3, the balance of Rs.166-12-11 with the Commission should be deducted from the grant to be paid now. I, therefore, propose that the Hon'ble the Resident may be pleased to sanction a grant of Rs.4,334-4-2 - Rs.166-12-11 = Rs.4,167-7-3 to be paid to the Municipal Commission during the current year as Grant-in-Aid. The expenditure will be debited to the allotment under the head "Account II - Education - F - Grants-in-Aid to Non-Government Special Schools - Grants-in-Aid to local bodies for special education - grants to Municipal Commission in the current year's Assigned Tract Budget.

(4) MEDICAL INSPECTION OF MUNICIPAL SCHOOLS.

6. The President anticipates an expenditure on this item of

Rs.217-14-3 which I recommend may be paid. No grant was paid to the Commission on this account last year. The expenditure will be debited to the allotment under the head "Account II - Education - D - Grants-in-Aid to Non-Government Primary Schools - Grants-in-Aid to Primary Schools" in the current year's Mysore Assigned Tract Budget.

SIR,

With reference to your letter No.2472/123-1932, dated the 23rd March 1933, I have the honour to inform you that the Municipal Gardening School was closed with effect from the 1st April 1933, as desired. I have made arrangements to dipose of the plants and other movables by public auction.

With regard to the land and building, the Inspector of Schools considers that since they were purchased out of Government grant, their disposal should have Government sanction, but I would suggest that the Municipal Commission must be considered absolute owners with full powers of disposal. If the Resident agrees with my view, the Inspector of Schools need not take any action with regard to the disposal of the school building and land, and he may be informed accordingly in answer to his letter No.1287/14-28 dated the 19th April 1933.

Subject:- Disposal of the land and building occupied by the Municipal Gardening School.

Sir,

With reference to your letter No. Gt. 81/32, dated the 4th May 1933, I am directed to say that the land and building occupied by the Gardening School should, on the analogy of Article 48 of the Grant-in-aid Code for Indian Schools in the Civil and Military Stn. of Bangalore, be handed over to Govt., as the purpose for which they were acquired has ceased to exist. If, however, the Municipal Commiession require the building for other educational purposes, they should make a fresh application in that behalf, which would be dealt with under Article 58 of the Grant-in-aid Code.

BANGALORE.
11 OCT 1933
Regd. No. 8805
File. No.

SIR,

Subject:-Disposal of the land and building occupied by the Municipal Gardening School.

S.N.10 & (K)

With reference to your letters Nos.4190/123-1932 and 9139/123-1932, dated the 7th June 1933 and 11th September 1933 respectively, on the above subject, I have the honour to state that the Educational Sub-Committee of the Municipal Commission to whom the question of utilizing the building and land occupied by the Gardening School for other educational purposes was referred, considered that the building was not suitable for a school nor the land suitable for constructing school buildings. The matter was placed before the Municipal Commission at their ordinary meeting held on the 30th September 1933, when, agreeing with the view expressed by the Educational Sub-Committee, they resolved that the building and site of the Gardening School be sold by public auction and that the Hon'ble the Resident be requested to permit them to utilize the sale proceeds for the construction of buildings on a more central site for the Municipal Mohamedan and Hindu Girls' Schools in Ulsoor - (vide copy of resolution No.5 dated the 30th September 1933, enclosed).

S.N.12 & (K)

2. Since the purpose for which the Commission requires the amount is an educational purpose, I request that the Hon'ble the Resident may be pleased to consider the Commission's application favourably and to allow them to use

the sale proceeds of the property in question to construct buildings for the two Girls' Schools mentioned in para 1.

5-IV-12 of (K)

3. In your letter No.9139/123-32 dated the 11th September 1933, you have communicated the Resident's sanction to the sale of the land not required for a school. Now that the Municipal Commission consider that the building is unsuitable for a school and the land is unfit to be built upon, I am issuing instructions to the Municipal Auctioneers to sell the whole plot with the building thereon in anticipation of your sanction. The sooner the land is sold, the better, since it is fast deteriorating in value.

I have the honour to be,

Sir,

Your most obedient servant,

10.X.33

PRESIDENT, M. C.

DIW.
9-10-33.

Municipal Commission's resolution dated the 30th September 1933. (Ordinary Meeting).

---

5. Consideration of the question as to how the building and site occupied by the Gardening School should be utilised.

The Committee (Educational Sub-Committee) does not recommend the building of schools on the site.

(Executive Engineer suggests the sale of the building and site and with the sale proceeds to purchase a more central site available to the south of the same road as the Gardening School and not more than 1½ furlongs from Old Madras Road for constructing schools).

Resolved that the building and site of the Gardening School be sold by public auction and that the Hon'ble the Resident be requested to permit the Commission to utilize the sale proceeds for the construction of buildings in a more central site for the Municipal Mohamedan and Hindu Girls' Schools in Ulsoor which are at present located in rented buildings.
